

## How to create Email Accounts in cPanel

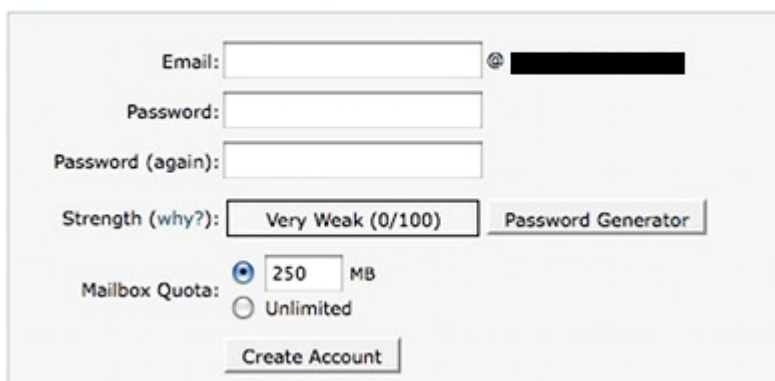

1. Login to your cPanel control panel
2. Click on the "Email Accounts" icon

Fill in the email you want, password, and mailbox quota and click "Create Account". You have the capability of setting the mailbox quota for each account you create.

### Email Accounts

*In this area you can manage the email accounts associated with your domain(s).*

The screenshot shows the 'Email Accounts' form in cPanel. It includes the following fields and options:

- Email:  @
- Password:
- Password (again):
- Strength (why?):
- Mailbox Quota:  250 MB  Unlimited
- 

....too easy, or what? \*\_\*
