## Making a backup in cPanel

Creating a Backup through the cPanel is the easiest thing you can do.

## Creating a Full Backup of your website:

1). Login to cPanel, and press the "Backup Wizard" icon.

Kome	REP LOBOUT
Backup Wizard Steps: Backup/Restore	ial Backup Download
Backup This feature allows you to download a zipped copy of your entire site or parts of it onto your computer. The following are backed up and included in a zip file for your convenience: Home Directory MySQL Databases Email forwarders configuration Email filters configuration Backup →	Restore This feature allows you to restore parts of your cPanel by uploading your partial backup zip file(s) that you downloaded from the backup feature. The following can be restored: Home Directory MySQL Databases Email forwarders configuration Email filters configuration Restore →

2) Click Backup. Your full backup will be downloaded in one click.

## 2. Creating a Partial Backup of your website:

Partial Backup is for those whose cPanel account is big. Partial Backup also ensures more **security** as Partial Backup is less prone to be corrupted. Partial backup is better than Full Backup.

1). In the **Backup Wizard click** on Partial backup.

2) There will be three files:

- Home Directory
- My SQL Databases
- Email Forwarders and Filters.
